2. INTRODUCTION

2.1. Background of PIKITUP Johannesburg SOC Limited

Pikitup Johannesburg (SOC) Ltd (Pikitup), 100% owned by the City of Johannesburg, and established on 1 November 2000 in terms of the Companies Act, No. 71 of 2008 and is mandated to provide integrated waste management services to the residents of Johannesburg. In line with the establishment of Pikitup, the Council utilises the Environment, Infrastructure and Services Department (EISD) as well as the appointed Board of Directors, and Group Governance Department to oversee the governance of the company, as well as to regulate it.

In order for Pikitup to successfully make a meaningful impact with regard to the guiding principles for waste management and ensuring resource security, environmental sustainability and good governance in the CoJ, the resources of the organisation must be directed towards the activities envisaged by the City's Growth and Development Strategy (GDS 2040).

The business plan for Pikitup responds to the Jo-burg 2040 ideals of resilience, liveability and sustainability. It reflects and attempts to strengthen the strategic framework based on cross-sectorial planning processes that have defined four outcome driven programmes for the new 5-year Integrated Development Plan (IDP). These programmes relate to the preservation of resources for future use as well as an improved service delivery culture. The business plan gives effect to these strategic objectives and responds to the need to develop a resilient, liveable, sustainable urban environment underpinned by infrastructure which is supportive of a low carbon economy. There is thus a need to focus on excellence in service delivery whilst ensuring that diversion of waste from landfills is optimised.

Pikitup is currently in a process to address and respond to these objectives and thus require the implementation of new projects and approaches, innovative solutions and changes within the organisation that will support the change in focus. There are therefore programmes included to shift the focus to waste minimisation whilst addressing service delivery failures and legacy issues. The approach is also to create opportunities community and stakeholder participation in the way services are delivered as well as the methodologies for projects implemented. It is believed that this will contribute towards the alleviation of poverty, inequality and unemployment. There

is a particular focus in the business plan to address organisational transformation in order to build an effective and efficient organisation that delivers world class services.

Pikitup has identified five goals to be achieved as an institution. Within these goals the objectives and the programmes of the City can be addressed. These are five identified focus areas and various projects and initiatives have been identified in the business plan. These are:

Goal 1: Shift towards Integrated Waste Management, Waste Prevention and Waste Minimisation These activities relate to ensuring that the necessary projects are implemented to ensure waste is diverted from landfills and that re-use and recycle activities are encouraged. In addition, the necessary infrastructure to support these initiatives has to be addressed. The projects included are separation at source roll out and extension to additional areas, building buy back centres and garden refuse sites, developing a business case for dealing with green waste and composting as well as addressing the operations and viability of the incinerator. The programme also recognises the role of waste reclaimers in the process and relevant interventions are included to formalise and structure this community.

Goal 2: The City of Johannesburg has high levels of unemployment, poverty and inequality. Waste minimisation provides opportunities to use waste as a resource and these should assist communities to address poverty. Consideration is given to the implementation of coproduction to address these challenges. Co-operatives / SMEs to be appointed through the community improvement programmes to take responsibility for cleaning in areas.

Goal 3: Provide Effective and Efficient Waste Services whilst investigating and implementing projects to enhance waste minimisation. It is necessary to ensure that current services are provided in an efficient manner and that service levels are improved. A clean city builds investor confidence and improves the health and quality of life of its citizens. Various initiatives are aimed at improved cleanliness levels in the inner city, outer city, hostels and informal settlements. Specified attention is also paid to measures to address illegal dumping in the City. In order for the operation to improve and become more efficient, particular attention will be given to the management of the fleet as it contributes to poor service delivery as well as high costs. Education and awareness creation in the community is critical

to address matters of illegal dumping, as well as more effective law enforcement. It is acknowledged that Pikitup cannot achieve these goals by itself and therefore requires partnerships and participation from various stakeholders.

Goal 4: Key to the successful achievement of waste prevention and minimisation is the change of citizen behaviour. The intention is to mobilise communities in partnership with labour, business and civil society to enable changed behaviour. This will result in a cleaner city with less littering and illegal dumping, as well as increased volumes of waste diverted from landfills.

Goal 5: Build an Effective waste management company. Various enabling services and processes are required to drive a highly efficient and effective organisation. In order to achieve this goal various supporting processes, systems and structures should be in place. These relate to:

- ☐ Review and implementation of appropriate policies
- ☐ Effective Management of risks
- ☐ Financial management
- ☐ Achieve a clean audit
- ☐ Building a skilled workforce aligned to the needs of the organisation
- ☐ Performance Management
- ☐ Communication and Stakeholder management initiatives to increase education and awareness.
- ☐ Improved productivity measures
- ☐ Customer Centric Approach

Pikitup is committed to continually improving its performance and the company is confident that it will exceed the expectations of all stakeholders thus attaining the vision of being “the leading integrated waste management company in Africa and be considered amongst the best in the World.”
